

Automotive Core Tools

In this 2-day seminar, you will learn everything about the most important tools required in the automotive sector. Our subject-matter experts address your specific requirements and help you understand the following subjects in a practical manner in the course of this seminar.

Seminar contents:

- + Standard structure
- + IMS in the automotive industry
- + Thought and action in processes
- + Overview of the Automotive Core Tools
- + APQP, FMEA, MSA, PPAP, CP (control plan), SPC
- + 8D Report
- + Product life cycle
- + „Group work and knowledge exchange

Target Group:

Automotive suppliers, project managers, project team members, advance quality planning and work preparation personnel, distribution staff

Customer benefit:

TopQM-Systems has been working in the area of supplier management for well-known companies in the automotive industry since 2000. The experience gained in live customer projects – such as advanced quality planning, start of new series production, process acceptance, supplier audits, claims management and process optimization – directly flow into our TopQM Automotive Seminars and are continuously updated. We are very familiar with the requests and requirements of our customers and we will prepare you to handle series processes in an efficient and robust way!

Certificate:

Each participant will receive a certificate of attendance "Automotive Core Tools".

Prerequisite:

No special prior knowledge is required.

Training documentation:

Paper copy of TopQM-Systems seminar materials.
